HomeSafe with Fall Detection

- All the benefits of our HomeSafe Basic service with the added layer of protection with fall detection

Wandering Technology – Coming Soon

Call our office for more details

ConnectCare is one of only a few medical alert systems owned and operated by a hospital. This means not only that subscribers get the very best care, it also means all net proceeds from the service go back to support hospital programs at Parkwood Institute and St. Joseph's Health Care London. This helps the broad range of health care services the hospital offers residents of Southwestern Ontario.
